

Michael Introduction Transcript

My name is a Michael, I am a musician, I played piano my whole life and I spend a lot of time by myself getting music ready but ultimately the only reason I do it is to share it with other people, so that is the reason to do it and to bring pleasure to other people in my piano performances is why all the preparation time is worth it but the preparation time, I like to do by myself. So it's kind of a weird life because a lot of the time I am by myself but then when I perform there are lots of people around you and you have to deal with that.
